There are different ways of indicating division.

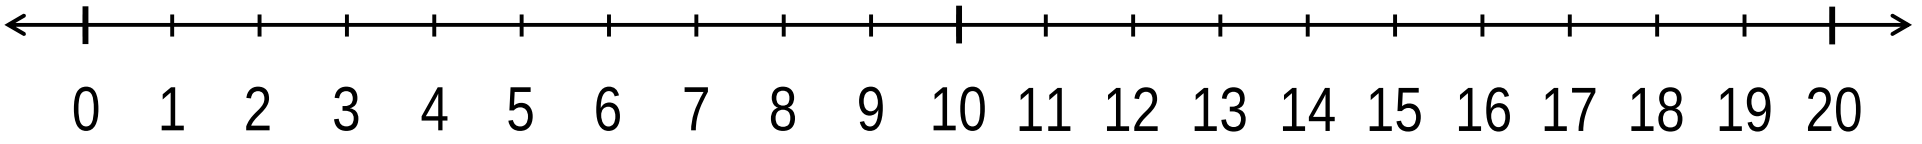
$12 \div 4$

$12 / 4$ All these expressions are telling you to “divide 12 by 4”.

$\frac{12}{4}$

$4\overline{)12}$

$12 \div 4$ $4 \times 3 =$ $12 \div 3$ $3 \times 4 =$

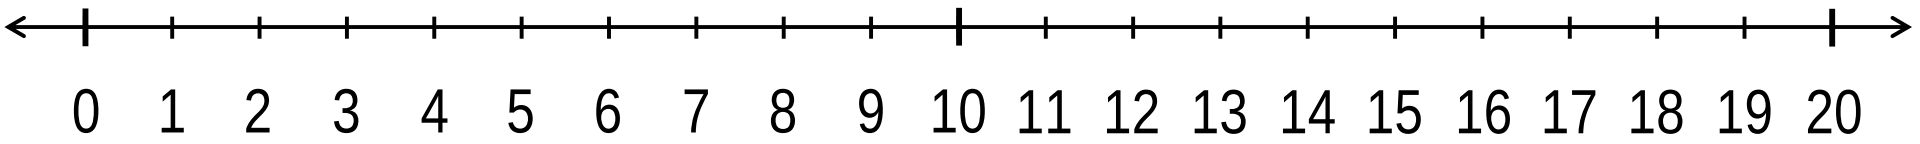


$13 \div 4$

3R1

$15 \div 4$

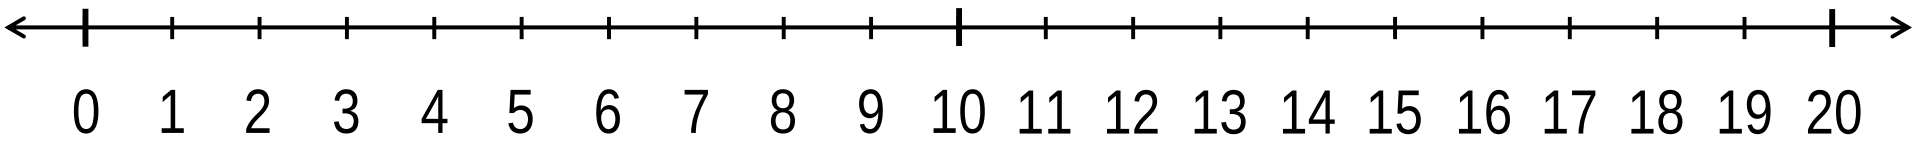
$$4\overline{)15}\quad 3$$



$15 \div 7$

$20 \div 7$

$$7\overline{)20}\quad 2$$



$4 \times 8 = 4 + 4 + 4 + 4 + 4 + 4 + 4 + 4$

$8 \times 7 = 8 + 8 + 8 + 8 + 8 + 8 + 8$

$\frac{32}{4} =$

$\frac{56}{8} =$

$\frac{59}{8} = 7\,R$

$$5 \times 13 = \underbrace{5 + 5 + 5 + 5 + 5 + 5 + 5 + 5 + 5 + 5}_{50} + \underbrace{5 + 5 + 5}_{15} =$$

$$\Big| \quad \frac{65}{5} =$$

$$5\overline{)\,6\,5}\;\;1 \qquad\qquad 5\overline{)\,6\,9}\;\;1$$

$$\frac{69}{5} = 13\ \mathrm{R}4$$
